Hi –

Thanks for trying to give me a heads up last week about the agreement Amphenol made with the mayor of Franklin. I don't have a smart phone and therefore don't get email when *en route*.

The mayor met with one of my managers, Mike Harris, the afternoon of the evening meeting, so we heard about the agreement. Mike told me that the mayor would not announce this remedy during his remarks at the meeting, but he did.

As I'm sure you understand, the sequence was not optimal. It must be understood that any remedy must proceed within the context of the RCRA CA federal regulatory program.

Next week, I will be sending Amphenol a request for a work plan for an interim measure to address the contaminated media along the streets in the study area.

Talk with you soon.

Carolyn

Looks like you're pretty well tied up. I left you a voice mail also but wanted to give you a heads up that we have agreed to work with the City to perform a sewer "replacement" which will include mitigation of soils from Hamilton down

Forsythe at least as far as Ross Court. A lot to be discussed both with the agency and the City but this is a positive step towards a long term solution. I'm sure that the mayor will bring it up in discussions either with the agency or maybe in the meeting so I didn't want you not to be aware. If you want to talk further, give me a call. Or we can talk next week when things start to settle down hopefully.

I know you're probably tied up with the meeting today but wanted to update you on the progress with the Sewer replacement talks with the City. Its positive and the Mayor will most likely talk about it. If you can't break away, let me know and I'll send you an email.
